

Introducing the Oxi-App™ System

A World First

for Optimising
Water & Soil Quality

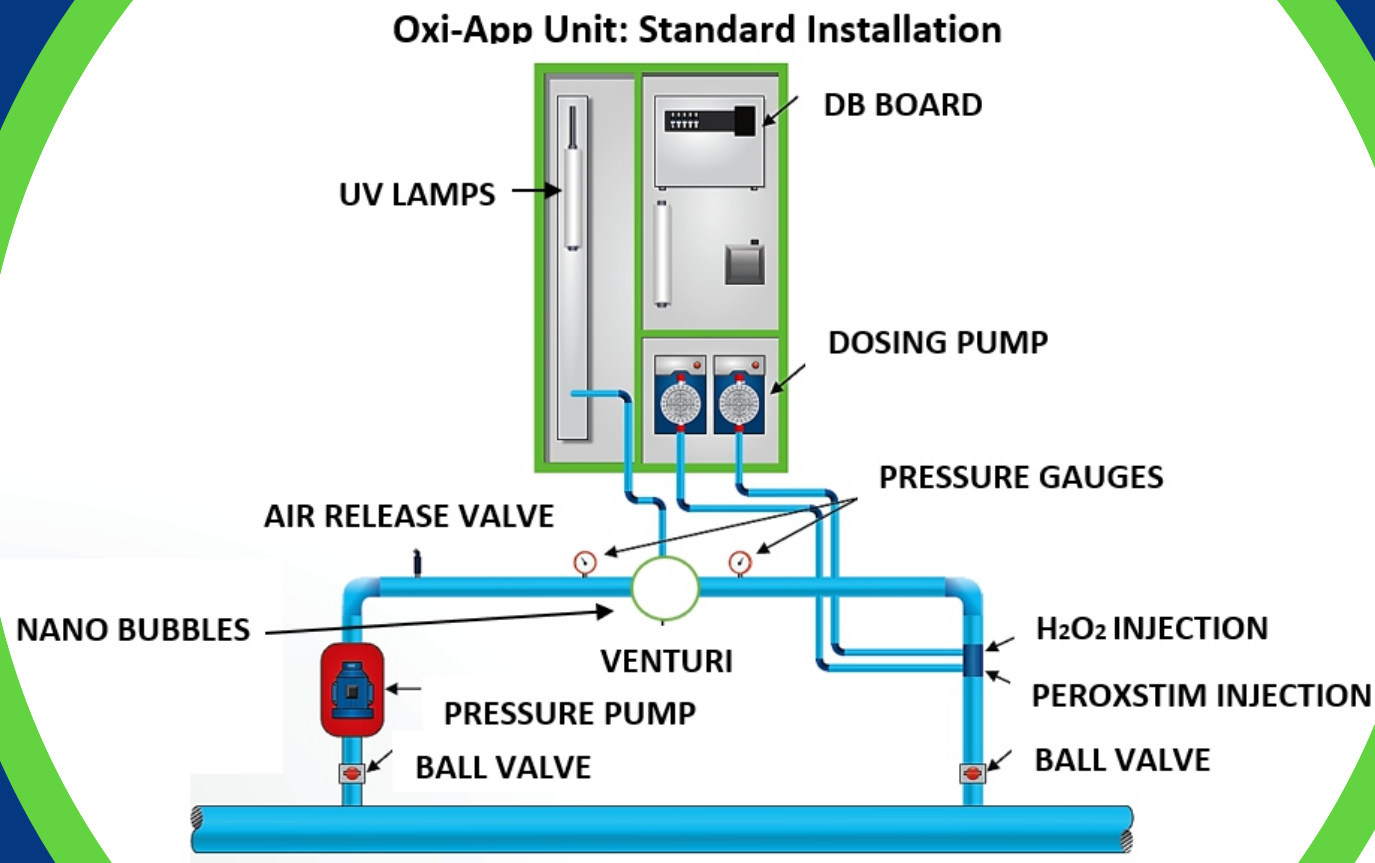

The Oxi-App™ System

A Unique Water Technology Combining the Application of:

- Nanobubble Technology
- Intense Oxidation Technology
- Natural chelate / bio-stimulants

Standard Installation

What does it offer the Farmer?

**A Cost-Effective, Easy to Use,
Bio-friendly** way in which to optimise
irrigation water, soil health and root
system development.

Optimising Water & Soil

Improves water quality, cleans the irrigation system and reduces soil compaction.

The delivery of Bio-stimulants in Peroxstim™ also stimulate and sustain microbes.

Benefits

- Irrigation systems are cleaned and run at optimum level.
- Even water & fertiliser delivery.

Benefits

- Stimulates microbes in soil.
- Soil compaction is eliminated.
- Increases the soil's water holding capacity.
- Heavy metals & chlorides oxidised.

Easy to Operate

- Can be fitted on any irrigation system.
- Easy to operate.
- No limit in terms of volume water to be treated.
- Low monthly operational cost.
